SUMMARY

Enthusiastic and detail-oriented senior tech professional passionate about problem-solving and continuous learning, Seeking to contribute to innovative projects and deliver impactful results

PROJECTS

Revinin : https://revinn.net/ Sept 2023 - April 2025

- Revinn is a creative agency that provides integrated branding, digital marketing, web development, and printing solutions to help businesses grow and stand out.
- Developed and maintained a dynamic company website using ASP.NET MVC, SQL Server, and front-end technologies (HTML, CSS, JavaScript, Web Api , payment gateway, JWT ,Signals, N-tier architectures), delivering
- Responsive and cross-browser compatible user interfaces.
  Optimized performance, integrated front-end with back-end systems, and handled database design, testing, debugging, and continuous improvements to enhance user experience.
- Reduced page load time by up to 40% and improved user engagement while delivering project milestones under tight deadlines.
- Collaborated with a remote team via Zoom, rapidly learned new technologies, and built key features such as admin dashboard/CMS to enhance system efficiency.

AL-Eman-Schools : https://www.aliman.sch.ps/ Aug 2020 - Aug 2021

- a comprehensive website for Al-Iman Schools that showcases the institution, presents its educational services, and enables interaction with students and parents through sections like registration, activities, and academic content.
- Developed and maintained a dynamic company website using ASP.NET MVC, SQL Server, and front-end technologies (HTML, CSS, JavaScript), delivering responsive and cross-browser compatible user interfaces. Optimized performance, integrated front-end with back-end systems, and handled database design, testing, debugging, and continuous improvements to enhance user experience.

Agricultural Engineers Syndicate : http://www.agrieng.org.jo/ April 2019 - Nov 2019

- A professional website for the Jordanian Agricultural Engineers Association that presents its services, activities, and communication platform for members while supporting the development of the agricultural engineering sector.
- Developed and maintained a dynamic company website using ASP.NET MVC, SQL Server, and front-end technologies (HTML, CSS, JavaScript), delivering responsive and cross-browser compatible user interfaces. Optimized performance, integrated front-end with back-end systems, and handled database design, testing, debugging, and continuous improvements to enhance user experience.
- Collaborated with a remote team via Zoom, rapidly learned new technologies, and built key features such as admin dashboard/CMS to enhance system efficiency.

WORK EXPERIANCE

Future Gates 🔗 : https://futuregates.co.uk/ *May 2016 – Present*
(Amman -Jordan)

Senior Full Stack Web Developer (Consultant)

- Architected and delivered 4+ enterprise web applications, including a high-traffic multilingual agricultural portal (agrieng.org.jo) and complex construction management systems.
- Engineered scalable backend services using ASP.NET Core and C#, implementing SignalR for real-time data synchronization across client platforms.
- Developed cross-platform mobile solutions using Flutter and Dart, delivering seamless e-commerce and educational applications for iOS and Android.
- Designed robust N-tier architectures and optimized SQL Server databases to handle complex business logic for e-commerce, booking, and blog platforms.

Loren Software Development *May 2013 – Apr 2016*
(Amman -Jordan)

Web Developer

- Led full-stack development of client web applications from architecture through to delivery, covering frontend, backend APIs, and database layers using ASP.NET and SQL Server.
- Maintained and extended .NET desktop applications, ensuring compatibility and performance for enterprise clients.
- Collaborated directly with clients to translate business requirements into technical solutions across multiple simultaneous projects.

Rhodes Precast Concrete *Jun 2004 – Oct 2008*
(Baghdad -Iraq)

IT Officer & Network Administrator

- Administered Windows Server 2016 environment with Active Directory across multiple domain sites, supporting 100+ workstations company-wide.
- Configured and maintained SQL Server 2012 for company engineering software (IDAT), enabling seamless file-sharing across all departments.
- Deployed and managed wireless networking, security cameras, and virtualized servers (VMware), reducing hardware costs through physical-to-virtual migration.
- Sole IT resource for all hardware procurement, printer management, and network troubleshooting across the organization.

SKILS

- ***Languages :*** *Arabic (Mother Tongue) - English*
- ***Tools/Frameworks : -***

  - Backend: ASP.NET Core 9, ASP.NET MVC, C#, SignalR,JWT , , Web API, T-SQL, Stored Procedures
